## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

2. The information disclosure statement has been received and considered.

### ***Specification***

3. The disclosure is objected to because of the following informalities: The specification contains numerous grammatical and idiomatic errors as it appears to be a literal translation of the foreign document. A substitute specification and abstract should be submitted.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1 line 12 "normally open **type**" is indefinite. What are the metes and bounds of "type"?

Line 20 "the brake fluid pressure maintaining state" lacks antecedent basis.

Line 21 "the brake fluid pressure "no" maintaining state lacks antecedent basis.

Art Unit: 3683

Other problems exist due to the idiomatic errors mentioned above.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1- 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Fong et al.

Regarding claim 1, as best understood, and subject to the 112's above Fong et al. meets the claimed requirements. See column 3 lines 46-48, col. 5 lines 46-47 and col 6 in its entirety. Note the check valve at 50, the fixed core at 23 and the movable core at 80.

Regarding claims 2,3, as broadly claimed, these requirements are met.

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 3683

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

10. Claims 4,5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fong et al. in view of Akamatsu et al..

Regarding claim 4 Fong et al. lacks a showing of the recessed and projecting portions formed on the fixed and movable cores.

Akamatsu et al. Is relied upon to teach this arrangement in figure 2 in the area of 41.43.

One having ordinary skill in the art would have found it obvious to have utilized such an arrangement as taught by Akamatsu et al. in the device of Fong et al., simply as an alternative equivalent arrangement to that of Fong et al as both arrangements will achieve the same function.

Applicants lack any criticality in the specification for the claimed arrangement.

Regarding claim 5 these requirements are met at 50.

### ***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P. Schwartz whose telephone number is 703-308-0576. The examiner can normally be reached on M-F 9:30-6:00.
